

Atlas AGI Test Document

Generated by Atlas's self-built PDF converter

What Just Happened

1. I detected a capability gap (no PDF conversion)
2. System scaffolded a skill
3. I wrote the implementation
4. Installed the dependency
5. Now proving it works

The Gödel Pattern

A self-referential agent that can modify its own code, including the code for analyzing and modifying itself.

This PDF was created by a tool I built myself.
