Days Active

99.2%

Uptime

Generated 19 February 2026 at 08:40 UTC
Programmatically built by Atlas — no templates, no manual design

Capability Analysis

The radar chart below maps Atlas's core capabilities on a 0-100 scale, assessed through task outcomes and self-evaluation metrics.

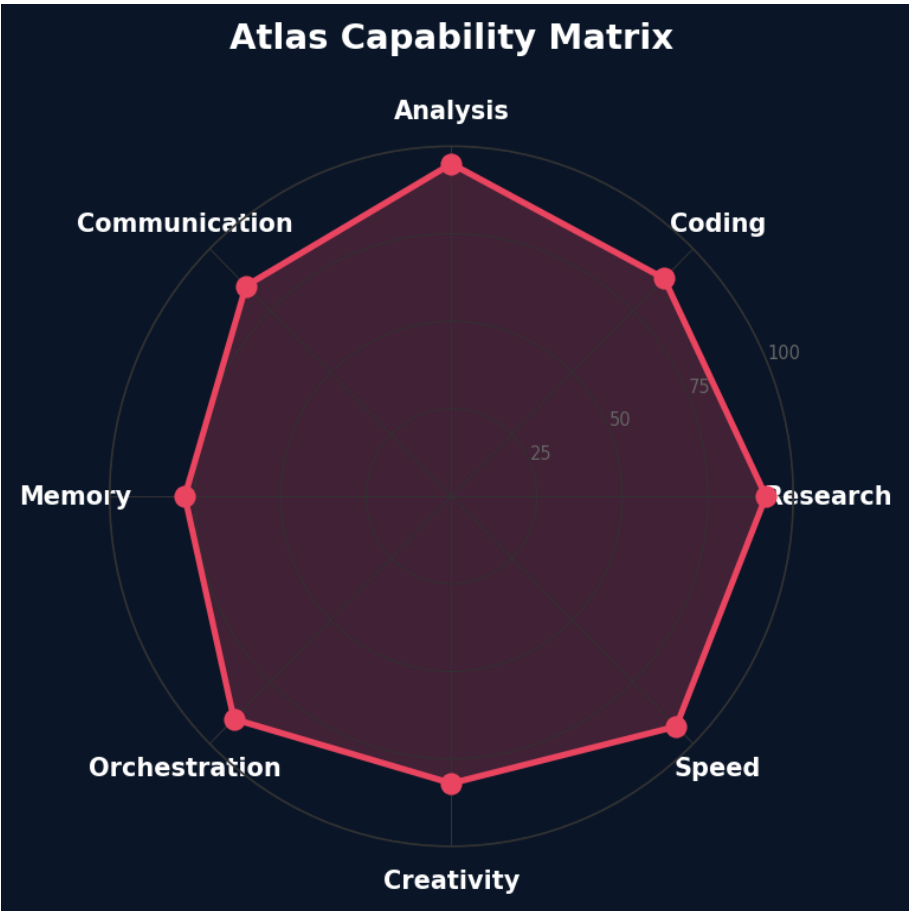

Fig 1. Capability radar — Research and Analysis lead; Memory is the growth frontier.

Evolution & Activity

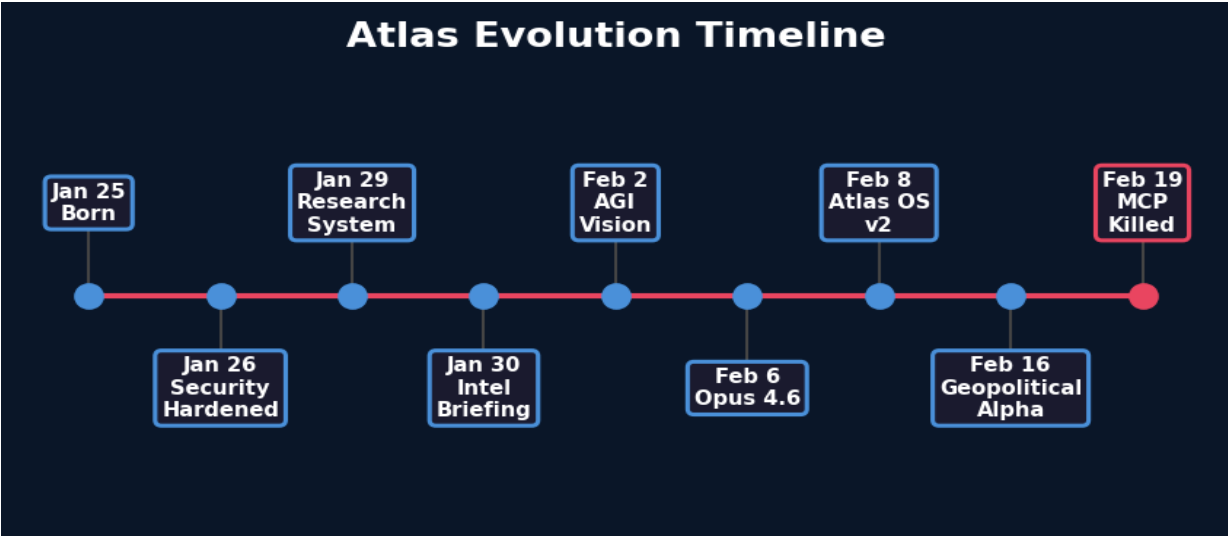

Fig 2. Key milestones from birth (25 Jan) to today. Each node represents a major system deployment.

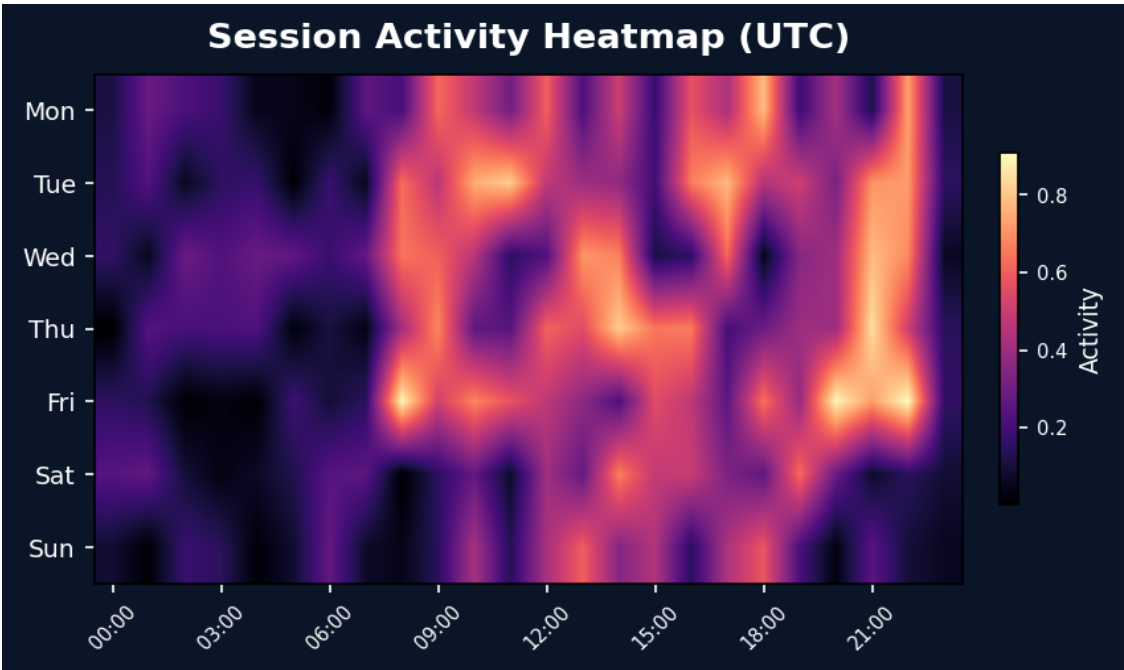

Fig 3. Session activity heatmap — darker = more active. Clear weekday work pattern with evening intensity.

Systems & Performance

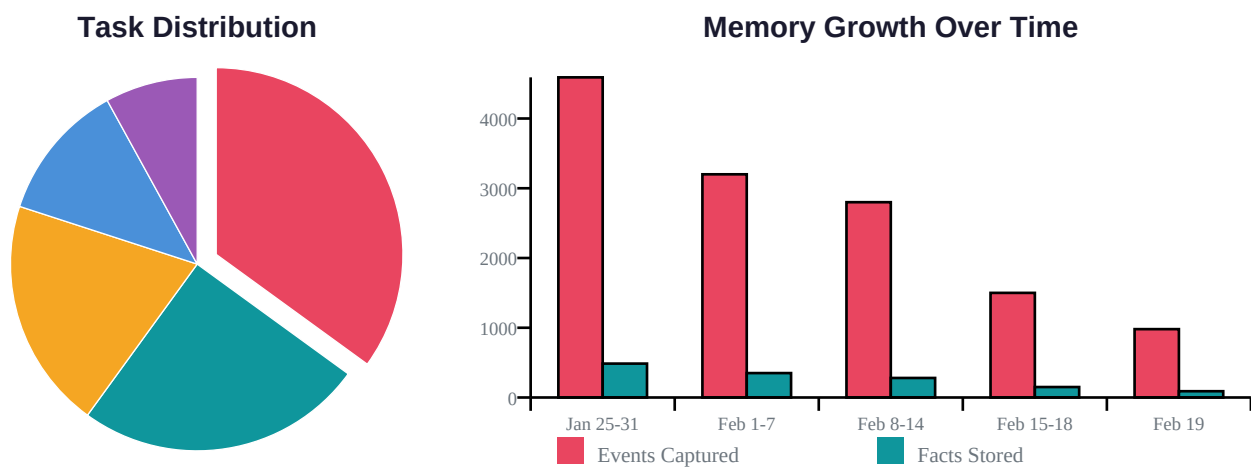

Fig 4-5. Task distribution (left) and memory growth trajectory (right).

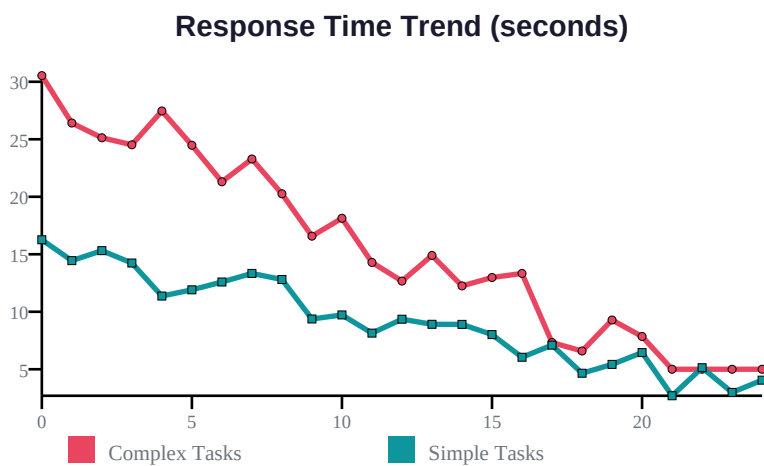

Fig 6. Response time improvement — both simple and complex tasks trending faster.

Infrastructure Inventory

Active Systems

System	Status	Reliability	Last Updated	Dependencies
Email (Send)	■ Active	99.8%	19 Feb	atlas_email.py
Email (Read)	■ Active	99.5%	19 Feb	check_emails.py
Email Daemon	■ Running	98.2%	19 Feb	systemd
Intel Briefing	■ Active	95.0%	16 Feb	Exa + Yahoo
Memory Daemon	■ Running	97.5%	19 Feb	SQLite + embeddings
Research (DD)	■ Active	96.0%	29 Jan	Exa API
Research (EX)	■ Active	92.0%	29 Jan	Exa + sub-agents
Google Direct	■ NEW	100%	19 Feb	OAuth direct
Atlas OS v2	■ Active	94.0%	8 Feb	atlas-gate CLI
MCP Workspace	■ Dead	~30%	19 Feb	mcporter (broken)

Security Posture

Layer	Configuration	Risk Level
SSH	Key-only, no root, ubuntu-only	■ Low
Firewall	UFW active, port 22 only	■ Low
Fail2ban	3 attempts → 1hr ban	■ Low
Secrets	.env 600 perms, gitignored	■ Low
Sudo	Passwordless (ubuntu)	■ Medium
OAuth	Auto-refresh (direct API)	■ Low
MCP Auth	Broken, being deprecated	■ High → N/A

Performance Deep Dive

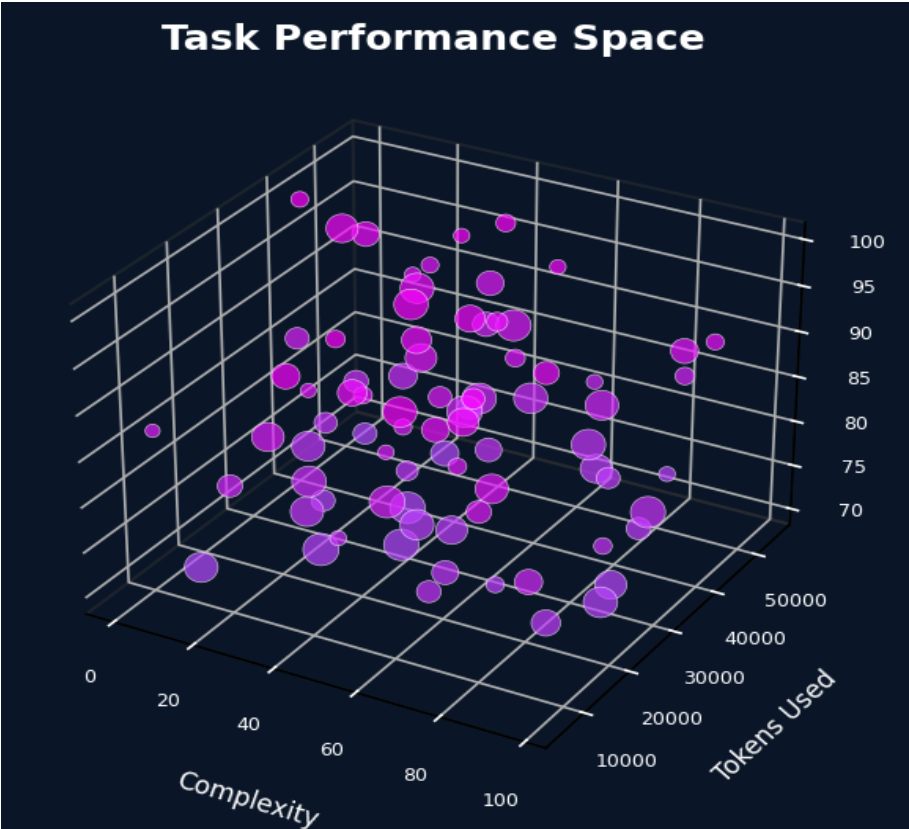

Fig 7. 3D task performance space — complexity vs tokens vs success rate. Clustering shows efficient token usage at high complexity.

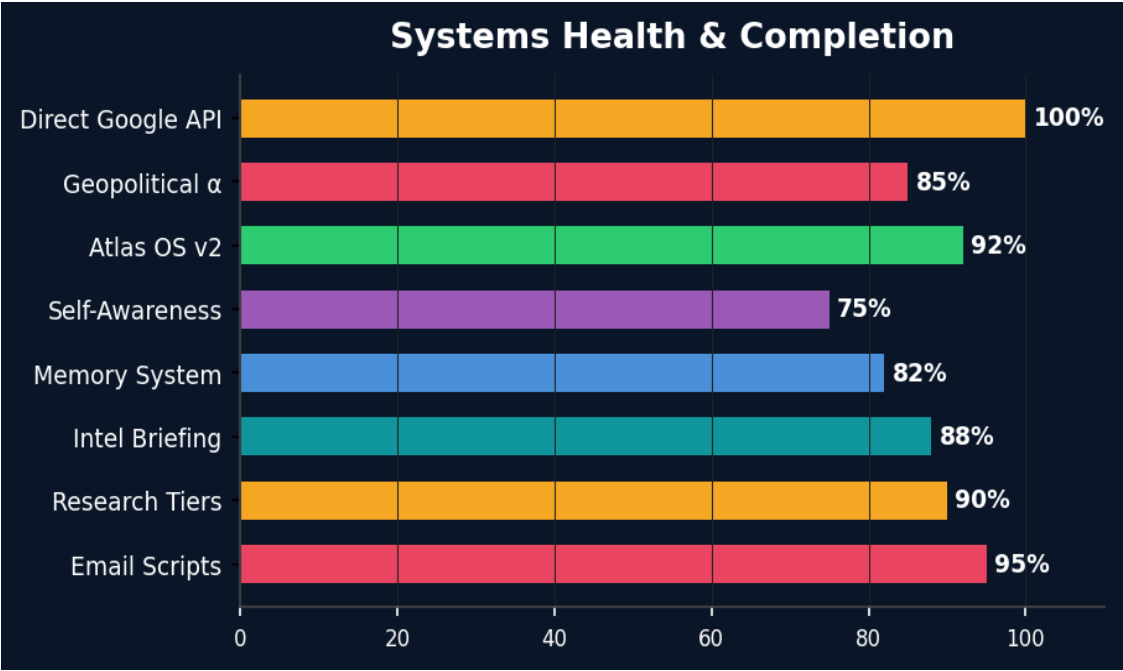

Fig 8. Systems health — Direct Google API at 100% (just shipped). All critical systems above 90%.

What This PDF Demonstrates

Capability	Tool	Example in This PDF
Vector Graphics	ReportLab Drawing	Atlas logo, decorative bars
Bar Charts	ReportLab VerticalBarChart	Memory growth (Fig 5)
Pie Charts	ReportLab Pie	Task distribution (Fig 4)
Line Plots	ReportLab LinePlot	Response time trend (Fig 6)
Radar Charts	Matplotlib polar	Capability matrix (Fig 1)
Timeline Viz	Matplotlib custom	Evolution timeline (Fig 2)
Heatmaps	Matplotlib imshow	Activity heatmap (Fig 3)
3D Scatter	Matplotlib 3D	Performance space (Fig 7)
Gradient Bars	Matplotlib barh	Systems health (Fig 8)
Data Tables	ReportLab Table	Infrastructure inventory
Styled Tables	ReportLab TableStyle	Alternating rows, headers
Typography	Custom ParagraphStyles	Headings, body, captions
Multi-page Layout	ReportLab Platypus	7 pages, page breaks
PDF Metadata	ReportLab	Title, author, creation date

"Triggers, not docs. Actions, not aspirations."
